M O O N

THE ART OF TECHNOLOGY

FOR IMMEDIATE RELEASE - December 18, 2002

Simaudio Ltd. proudly announces the introduction of the new **MOON Stargate Preamplifier/Processor**, our newest addition to the **MOON A/V series** of Home Theater components. With a strong emphasis on flexibility, features included are independent 2nd zone I/O, a rack-mount ready chassis, a 7.1 analog "Pass-Through" input, integrated video switching, an AM/FM tuner with memory presets and a whole lot more. Regardless of your choice of software, be it music or film, stereo or multi-channel, the **MOON Stargate** will redefine your concept and understanding of home entertainment.

Significant Design Features:

- Supported surround modes include Dolby® Surround ProLogic® II, Dolby Digital® 5.1, Dolby Digital® Surround EX, DTS Digital Surround 5.1™, DTS-ES™ 6.1, DTS Neo:6® and 7.1 Matrix Music Mode.
- Full-function programmable remote control.
- Easy upgrade path based on "Open Architecture" flash-memory circuit design.
- 24-bit/192kHz Crystal CS43122 digital-to-analog converters (4).
- Crystal CS3310 digital volume controls (4) with switched resistive array technology.
- 24-bit/96kHz Crystal CS5396 analog-to-digital converter for analog inputs.
- "Rack mount ready" faceplate with removeable aluminum cheeks to cover the rack holes when not in use.
- Three 12 Volt triggers for remote operations.
- Nine analog inputs with defeatable analog filter and bass management.
- Full-function RS-232 port control and status for custom integration or automation.
- Video switching via seven different inputs (composite, S-Video and component).
- Fully independent "2nd Zone" input & outputs for multi-room applications.
- Video signal converter for S-video to composite video.
- On-Screen Display (OSD) for options and calibration settings.
- Improved reliabilty through the elimination of moving parts.
